

FOR WOMEN, BY WOMEN

INTRODUCTION TO HANDGUN SHOOTING AND OWNERSHIP

Venturing into the world of handguns can be intimidating to ANY new shooter. But in most training programs the language, training styles and resources available are primarily developed with men in mind. For many women this results in a classroom and range training atmosphere that doesn't fit their needs.

In the "For Women, By Women" class students learn how to safely and confidently handle a firearm, while addressing the unique challenges women may face while learning to shoot.

The class is conducted over two consecutive evenings. The first evening, students will be in the classroom learning the fundamentals of firearms safety and the basic use of handguns. The second evening, students will be on the range learning to shoot using semi-automatic handguns in .22, .380, 9mm and .45 calibers as well as revolvers in .22 and .38 calibers. Students may also bring their own handgun for individual coaching.

Handgun Safety

- WHY you should know how to use a handgun?
- The 4 universal gun safety rules
- Safe handling of handguns
- Safely storing & transporting a handgun

Handgun Shooting Basics

- Revolver & semi-automatic: what's the difference & which is for you?
- Grip, stance, and trigger control
- Shooting fundamentals
- Personal protective gear

Things to Consider

- Selecting and purchasing a firearm
- Going to a range & what to expect
- Importance of practice
- Legal ramifications
